

TAGSON®

Double headed automated tagging machine

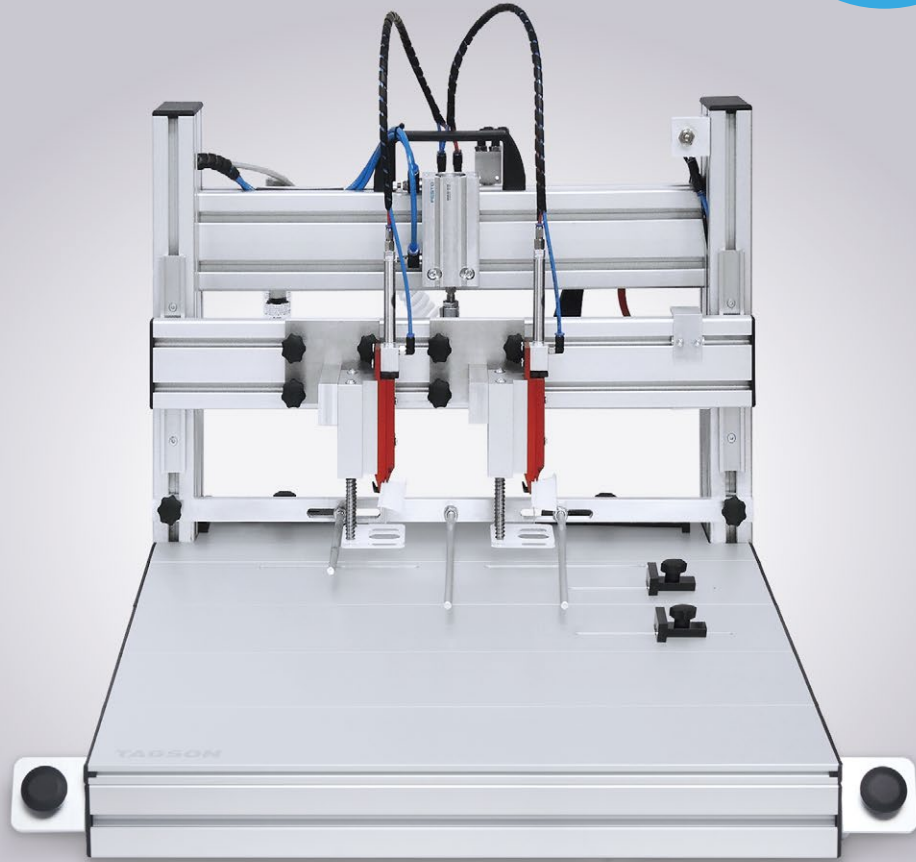

Perfect solution for tagging mats, pads and towels.

PS-1/DUO

Reduce costs

Simplify workflow

Portable machine

This pneumatic machine is portable, needs only air supply.

Working surface with guides

Size of the working surface and guides is adjusted to the dimensions of the product.

Speed adjustment

Adjust speed and pressure of the machine. Machine can do 1 cycle in 3 seconds.

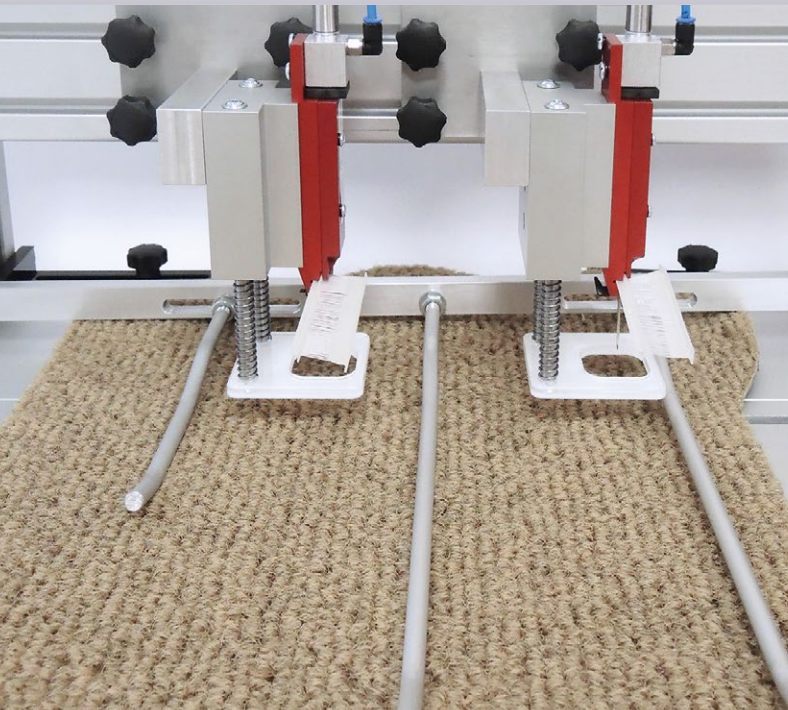

Feed switch

Change the length of the fasteners during the process. Feed switch safely removes the fasteners.

Safety control

Two-hand manual safety control according to the standards of the European Union.

Single Shot – Double Hit

Increase productivity

Reliability, productivity, speed, ergonomics and accuracy are the main attributes of the new pneumatic automated portable tagging machine. PS-1/DUO is irreplaceable for all **doormats, pads, towels**, etc manufacturers who want to simplify workflow, increase productivity and reduce the costs of packaging. Thanks to its compact design and quick activation, the Portable Automated Double Needle Tagging machine PS-1/DUO fits easily into all kinds of packaging lines.

Portable machine powered by Avery Dennison®

Each machine is made with the highest precision and tailored to end-consumer requirements. The heart of the machine is powered by **two Avery Dennison SPU modules** which ensures highest standard of industry quality and reliability. Modules can be changed with any other Avery Dennison tagging module for your maximum efficiency. The base of the machine is carefully designed with best components such as valves, switches, handmade axis, aluminium rack and stand, PTFE holders, etc.

Double or Single shot in One cycle increases productivity.

New automated PS-1/DUO can pack up to 70 mm thick products in one cycle using double or single shot action due to its two Avery Dennison modules.

→ SPEED

2 seconds per product (1 cycle / 2 fasteners)

→ EUROPEAN QUALITY

PS-1/DUO is designed by highly skilled engineers and manufactured from Premium materials in EU.

→ CUSTOM MADE

Each machine is made and tailored to end user requirements. Working surface is designed based on product size.

→ UNIVERSAL

Machine is made for tagging small, medium or large dimensions of products and for light or heavy materials. You can use single or double shot in one cycle.
